

Hi, My name is Anakin Skywalker

Analytical, goal oriented leader with proven track record in management and enforcement Space Fleet Operations and Frontend Development. Wide range of hands-on experience, including:

- Large scale construction projects oversight
- Advanced forms of mind control
- Planetary scale demolitions operations
- Fugitive recovery services

“
Together we can rule the galaxy

NOTABLE ACHIEVEMENTS

Designed, built and piloted a custom pod racer. 32 BBY Boonta Eve Classic Race Champion.

In my spare time at Wald's Parts junk shop I designed and built a Class III open cockpit Podracer capable of 588 mph top speed. Went on to win the Boonta Eve Classic race in 32 BBY - first ever win by a human. Generated documented company revenue of over 59 wupiupi during the course of my enslavement.

Oversight of DS1 and DS2 Orbital Battle Stations construction projects

During my tenure as a Supreme Imperial Fleet Commander I was in charge of large capital construction projects for the Deep Space Fleet. Performed acceptance testing of the DS1 SuperLaser in 0 BBY by annihilating Alderaan - a terrestrial class planet in the Core Worlds region. Successfully tripled the deep space fire power of the imperial fleet in accordance with the Tarkin Doctrine before losing both projects to run-away photon torpedoes.

Find your track on a path disturbing.

EXPERIENCE

Sith Empire Headquarters, Dromund Kaas

Supreme Commander of Imperial Forces, Emperor's Enforcer

- As the right-hand man to Emperor Sidious, hunted down jedi survivors and enforced the will of the empire;
